

django®

piadouro

- This is a database backed web app, right?
- We need to Create/Read/Update/Delete data from a relational database.

Django, #4 models

**Not Sure if I know SQL**

A cartoon illustration of a man with bright orange, spiky hair and thin-rimmed glasses. He is shown from the chest up, wearing a red jacket over a white shirt. He has a long, pointed nose and a slightly downturned mouth, giving him a confused or skeptical expression. The background is a simple blue-grey gradient with some faint lines suggesting an indoor setting.

**Wait, I don't know even what SQL means..**

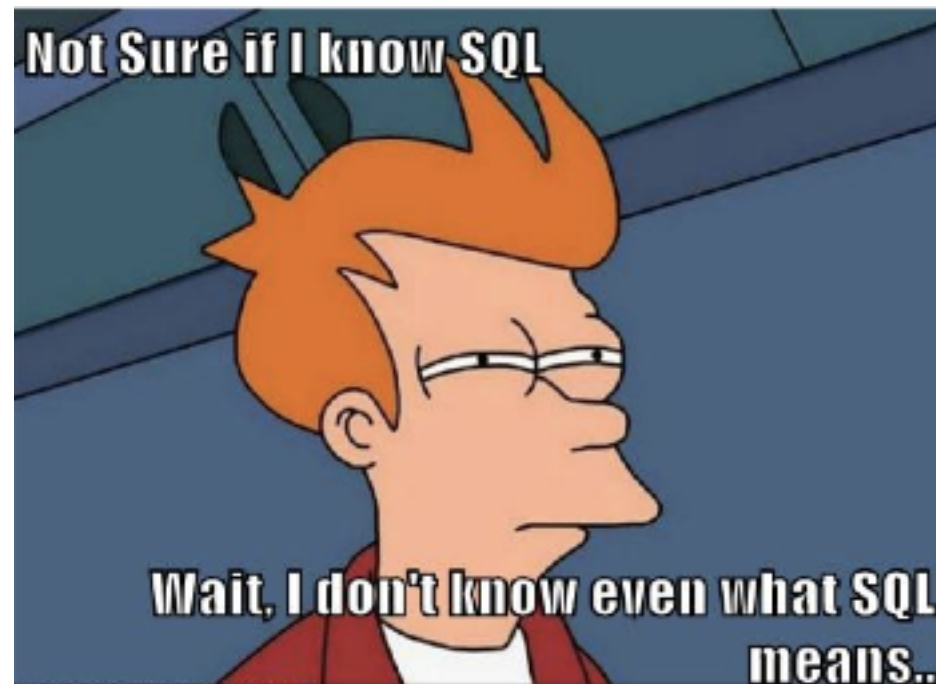

# Django, #4 models

- This is a database backed web app, right?
- We need to Create/Read/Update/Delete data from a relational database.

# Django, #4 models

- Models: database tables represented in Python Code.
- Your handle to:
  - creating the necessary tables
  - generating the SQL to Create/Read/Update/Delete Data
  - ORM - Object Relational Mapper
