

# Django, #3 templates

- Define Template location for project

*<project>/settings.py*

```
TEMPLATES = [  
    {  
        'BACKEND': 'django.template.backends.django.DjangoTemplates',  
        'DIRS': [BASE_DIR / 'projeto5/templates'],  
        'APP_DIRS': True,  
        'OPTIONS': {  
            'context_processors': [  

```

# Django, #3 templates

*Projeto5/templates/Projeto5\_website/base.html*

```
<html>
  <head>
    <title>project – the best app</title>
  </head>
  <body>
    <h1>Welcome to project!</h1>
    {% block content %}
    {% endblock %}
  </body>
</html>
```
