

Django, #5 forms

- Create an url entry to the form

projeto5/urls.py

```
path('pergunta_form/', views.pergunta_form, name='pergunta_form'),
```

Django, #5 forms

- Create a new template to render the form

projeto5_website/templates/pergunta_form.html

```
{% extends "projeto5_website/base.html" %}

{% block content %}
<form action="" method="post">
    {% csrf_token %}
    {{ form.as_p }}
<button type="submit">Salvar</button>
</form>
{% endblock %}
```
