## Django, Project, App

Take a look at settings.py (app section)

```
33 INSTALLED_APPS = [
34    'django.contrib.admin',
35    'django.contrib.auth',
36    'django.contrib.contenttypes',
37    'django.contrib.sessions',
38    'django.contrib.messages',
39    'django.contrib.staticfiles',
40 ]
```

The initial project already has many applications, I've just added the app that we've created a few slides before

## Django, Course App

django

- OK, help me I need some ideas!
- Not bullshit like library system, movie database and others...
