Django, Course App,
Projeto5 TO-DO 3:

- Add `home.html` and `base.html`, adjust TEMPLATE in `settings.py` and improve home view in `views.py`

<project>/templates/<project>_website/base.html

```html
<html>
  <head>
  <title>project – the best app</title>
  </head>
  <body>
    <h1>Welcome to project!</h1>
    {% block content %}
    {% endblock %}
  </body>
</html>
```

<project>/settings.py

```python
{
    'BACKEND': 'django.template.backends.django.DjangoTemplates',
    'DIRS': [BASE_DIR / 'projeto5/templates'],
    'APP_DIRS': True,
```

<project>/templates/<project>_website/home.html

```html
{% extends "projeto5_website/base.html" %}
{% block content %}
{{ hello }}
{% endblock %}
```

<project>_website/views.py

```python
from django.shortcuts import render
from django.http import HttpResponse

# Create your views here.

def home(request):
    return render(request, "projeto5_website/home.html",
        {"hello": "Beep, Beep, Beeep! I'm alive!"})
```

Django, #3 templates, tags and filters

- You're going to have to learn a bunch of tags and filters.
- Don't worry - they're easy.
- See https://docs.djangoproject.com/en/4.0/ref/templates/builtins/
