- Regular expressions?

Django, #1 urls

Run for your lives!

- Fast and flexible

- Coming from webserver world of Apache (and others) this the obvious way…

- We can start copying and pasting, so we have time to learn later =)

Django, #1 urls

- Regular expressions?

Run for your lives!

- Fast and flexible

- Coming from webserver world of Apache (and others) this the obvious way…

- We can start copying and pasting, so we have time to learn later =)

Django, #2 urls

```python
from django.urls import include, path

urlpatterns = [
    path('index/', views.index, name='main-view'),
    path('bio/<username>/', views.bio, name='bio'),
    path('articles/<slug:title>/', views.article, name='article-detail'),
    path('articles/<slug:title>/<int:section>/', views.section, name='article-section'),
    path('weblog/', include('blog.urls')),
    ...
]
```

- Regular expressions? re_path

- Not Regular expressions? path
